

Privacy Policy

Scope of Collected Data

carbonited.com may process the following user data, either directly through its own activities or via integrated third-party services: Browsing and usage history; cookies; email address; first and last name; information shared during platform usage; digital advertising IDs (such as Google Advertising ID or IDFA); technical data belonging to the device used; survey/question responses; click and keyboard movements; device motion sensor data; mouse movements and screen scrolling coordinates; touchscreen interactions; the platform's total visitor volume, and statistical reports regarding user sessions.

To outline a general framework, a standard Privacy Policy clarifies the following core elements: Which data the platform collects and through what methods; the primary purposes behind this collection process; scenarios for sharing the collected data with third parties; how visitors can exercise their rights within the framework of legal regulations; special measures for protecting children's data, and other details regarding the operation of the platform.

Details of the data collection processes can be accessed through specific information texts located in the relevant areas of the platform or via instant warnings/pop-ups that appear at the moment the data is requested.

Thank you for visiting our platform. The privacy of our users is our highest priority. As carbonited.com, we commit to ensuring the security of the personal data you entrust to us and protecting your privacy. This policy document explains how your data is collected, processed, and protected while using the platform.

Unless explicitly stated otherwise, entering the information requested by carbonited.com is mandatory. If the required data is not provided, carbonited.com may not be able to fully deliver the promised service. On the other hand, failure to share data marked as optional does not negatively affect the service quality or the functioning of the platform in any way. Users may transfer their data to the platform of their own free will, just as usage data automatically generated during the use of the platform can be automatically recorded by the system itself.

carbonited.com or service providers acting on its behalf may use cookies and similar tracking technologies to deliver the requested service flawlessly, to achieve the purposes stated in this text, and, if applicable, to pursue the goals specified in the Cookie Policy. In the event that users share data belonging to third parties via carbonited.com, they declare that they legally possess the right to broadcast and transfer this data. Any legal liability that may arise during this process belongs entirely to the user, and the Data Owner is held exempt from such situations.

Method and Geographical Location of Data Processing

Security and Processing Methods

The Data Owner implements all necessary technical and administrative security measures to prevent unauthorized access, alteration, disclosure, or destruction of user information.

Data processing procedures are carried out entirely in line with the specified purposes, through information technologies and computer systems, and in accordance with corporate rules. Internal teams of carbonited.com managing operational processes (management, sales, marketing, law, and system administration) or external business partners (infrastructure providers, shipping companies, hosting services, IT firms, and communication agencies) may access user data in their capacity as "Data Processors" and only to the extent necessary. An updated list of the parties involved in this structure can be requested from the Data Owner at any time.

Legal Grounds for Processing

The Data Owner processes the user's personal information only if at least one of the following legal grounds exists:

- The user has given explicit consent for a specific topic or purpose (Note: Under some legal frameworks, data may be processed without explicit consent as long as the user does not object [opt-out]. However, this exception does not apply to processing operations within the scope of European data protection law [GDPR]);
- Data processing is mandatory for the establishment or performance of a contract made with the user;
- The Data Owner is obliged to fulfill a legal obligation;
- The processing is directly related to a task carried out in the public interest or in the exercise of an official authority;
- Data processing is mandatory to protect the legitimate interests of the Data Owner or a third party.

The exact legal ground (such as a statutory requirement, contractual obligation, or pre-contractual processes) upon which a specific data processing activity relies can always be clarified by applying to the Data Owner.

Retention and Transfer Location

Data is processed at the Data Owner's management offices and at the operational locations of the business partners involved in this process. For detailed information on the subject, the Data Owner can be contacted directly.

User data may be transferred to a country outside the borders of the country where they are located. Details regarding the geographical boundaries within which data is processed can be found in the "Details on the Processing of Personal Data" section.

Users have the right to request information from the Data Owner regarding the legal grounds for cross-border data transfers (for example, transfers made to international public law organizations such as the UN or outside the EU) and the security measures taken during this process.

Data Retention Periods

User data is maintained in the systems only for the duration required by the purposes for which it was collected.

In this context:

- Data collected for the performance of a contract is stored until the contractual relationship in question is completely terminated.
- Data processed in line with the legitimate interests of the Data Owner is retained until these interests are fully met. Detailed information regarding the specifics of legitimate interests can be obtained by consulting the Data Owner.
- In scenarios where the processing is based on user consent, the retention period may be extended until such consent is withdrawn. Additionally, it may be necessary to store data for a longer period in line with a legal obligation or the instruction of official authorities.

Following the expiration of legal retention periods, data is permanently deleted from the system. Once the period expires, the users' rights to access, delete, rectify, or request data portability disappear.

Purposes of Data Processing

User data is collected and processed for purposes such as delivering the service uninterrupted, fulfilling legal requirements, responding to administrative/legal requests, protecting the rights of the platform and users, preventing fraud or malicious attempts, as well as for the following activities:

Content integration from external platforms, statistical analyses, management of messaging and communication channels, establishing direct contact with the user, tracking payment processes, remarketing and behavioral advertising, operating support and feedback systems, hosting and server infrastructure, advertising activities, comment systems, customer request management, social network integrations, online meeting and voice communication tools, management of surveys and data collection forms, tag management, database optimization, SPAM filtering, and network traffic balancing.

carbonited.com does not respond to "Do Not Track" requests from browsers. To review in detail which data is processed for which specific purpose, you can take a look at the "Details on the Processing of Personal Data" section.

Details on the Processing of Personal Data

User information is collected and processed under the following main headings to carry out the operational processes summarized above:

- In-platform comment systems
- Direct user communication
- Contact lists and notification management
- User profiles database management
- Financial transactions and payment infrastructure
- Website tag processes
- Online surveys and data collection tools
- Customer relations and support tickets
- Digital voice/video conference systems
- Server and backend services
- Integrations with feedback platforms

- Social media and external platform connections
- Network traffic distribution and optimization
- Security and spam (SPAM) prevention
- Digital marketing and advertising
- Behavioral targeting and remarketing
- Data analytics and statistics
- Display of third-party content windows

Disabling Interest-Based Advertising

Personal data refers to any data that allows an individual to be identified directly or indirectly when matched with different information (including identification numbers, IP addresses, etc.). Users can review the Cookie Policy text to learn how to turn off general interest-based advertising outside of their advertising preferences on the platform.

European Union (EU) Emphasis

All references to the European Union within this text should be interpreted to cover all current member states of the union, unless stated otherwise.

Legal Rights of Users

Users hold the following legal rights over their data processed by the Data Owner:

- **Withdrawing Consent:** Consent previously given for data processing can be revoked at any time.
- **Objecting to Processing Activities:** Users reserve the right to object to data processing procedures carried out based on a legal ground other than explicit consent.
- **Accessing Data:** The right exists to learn what data is being processed, to be informed about the processing details, and to request a copy of the data.
- **Requesting Rectification and Updates:** Requesting the update or correction of incompletely or incorrectly recorded data is permitted.
- **Restricting Processing:** Under certain conditions, users can request that the processing of data be halted and merely stored in the system.
- **Requesting Data Deletion:** When legal conditions are met, users can request the complete erasure of all personal data from the system.
- **Data Portability:** Users can request to receive their data in a commonly used, machine-readable digital format or, if technically feasible, to have it transferred directly to another platform (This right applies to data processed by automated systems and based on consent or a contract).
- **Right to Lodge a Complaint:** A complaint can be filed with official authorities competent in data protection, or legal proceedings can be initiated.

Detail on Objecting to Marketing Activities

If personal data is processed directly for marketing or advertising purposes, users may request that this processing be stopped without showing any justification.

Method of Exercising Rights

To benefit from the rights mentioned above, a request must be forwarded to the contact addresses of the Data Owner. These applications are entirely free of charge and will be concluded within one month at the latest.

Additional Legal and Technical Information

Legal Defense and Court Proceedings

User data may be used as a defense tool by the Data Owner in legal disputes, at the court stage, or in pre-trial preparation phases that may arise from the misuse of carbonited.com or related services. The user accepts in advance that their data may be disclosed in line with the legal requests of official authorities.

System Logs (Log Records)

Within the scope of stable operation and maintenance operations of the system, the carbonited.com network and integrated external services may automatically record system logs (log files) that can contain personal data such as users' IP addresses.

Updates to the Policy

The Data Owner reserves the right to modify this privacy notice at any time. Changes are announced to users through this page, on the carbonited.com platform, or, if technically possible, via registered contact information. For this reason, it is recommended to check the last update date at the bottom of the page frequently. If the changes affect a process based on explicit consent, a renewed approval is requested from the user.

Regulatory Compliance Statement

To protect user privacy, we ensure full compliance with all global data protection standards, including the provisions of Articles 13 and 14 of the European Union's General Data Protection Regulation (GDPR) No. 2016/679 and the California Consumer Privacy Act (CCPA) in the United States.

In accordance with COPPA (Children's Online Privacy Protection Act), data from children under the age of 13 is strictly not collected without parental permission. If the contrary is noticed, the relevant records are immediately and permanently deleted.

This policy text, unless stated otherwise, only covers the carbonited.com domain.

International Data Flow

Users accessing from outside the United States know that their data can be transferred to, stored, and processed on servers in the USA, and by using the platform, they are deemed to have consented to this cross-border data transfer.

Contact

For all your questions regarding this text or privacy practices, you can contact us via the address info@carbonited.com.

Conceptual Definitions

- **Personal Data:** Any record that makes a natural person identifiable directly or indirectly (when combined with an identification number or additional data).
- **Usage Data:** Technical information automatically generated in the background during the use of carbonited.com; such as IP addresses, browser type, URI addresses, request time, server response codes, time spent on the page, and in-platform navigation steps.

- **User:** The natural person who benefits from carbonited.com services and whose personal data is processed.
- **Data Subject:** Refers to the natural person who is the owner of the personal data.
- **Data Processor:** The natural or legal person who carries out data processing activities in line with the instructions of the Data Owner and on their behalf.
- **carbonited.com (Application):** The digital platform, software, or hardware assembly where data is collected and processed.
- **Cookies:** Small data files stored in the user's internet browser.
- **Tracking Tool:** Any technological method such as cookies, web beacons, e-tags, or digital fingerprints used to monitor user behavior.
